

Hi Derrick,

Thank you so much for the opportunity to learn from you at the Do It Yourself Gunsmithing (DIYG). My Winchester 52B is a family heirloom – my mother used it in high school to be a 3X state champion and it has been passed to me and my family.

My goal was to learn about and improve the trigger pull on this rifle. The rifle is very accurate and repeatable but the trigger tended to have some creep. The DIYG course was great as it allowed me to perform the tasks I knew and have you supervise and be available to help as needed.

I now have an excellent trigger on this old rifle and a good understanding of the interaction of the trigger/sear/bolt/safety so that I can keep the gun in top condition. I plan to sign up for additional DIYG time in the future so we can work on some other projects.

Andy
